

# NOTICE

People with chronic respiratory disease cannot wear surgical masks:

- Asthma
- Bronchiectasis
- COPD
- Deviated septum
- Heart failure
- Lung cancer
- Pulmonary fibrosis

Stop regurgitating fake news about the effectiveness of N95 masks for protection. There are people trying to be healthy while you assault them like an immunity bandit behind a unisex-hijab issued by the empty shell of government. You look like a retarded bank robber and all you are doing is making people feel sick.
